

IN-LINE CIRCULATION HEATER FIL MODEL

SPECIFICATIONS

Stainless Steel construction
Outside Diameter : 49mm x 381mm
Inlet : PG 11
Outlet : 1"NPT
Single Phase

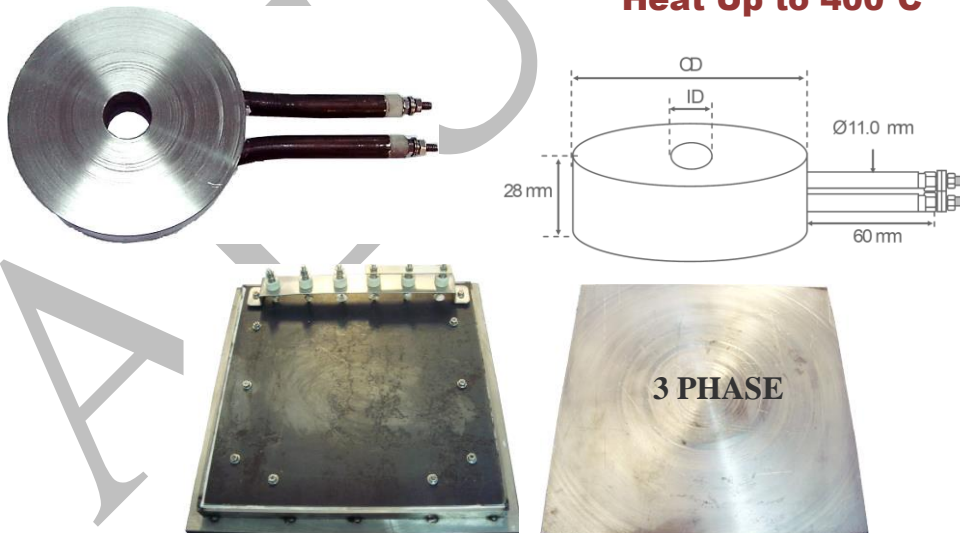

STANDARD MODEL

Order Code	Rating
FIL-001	200V 5000W

CAST HEATER HOT PLATE CAS MODEL

Are designed for applications where evenly distributed wattage at closely controlled temperatures and must be maintained over a uniform area of the work surface. The thermal energy of the heating element located within the casting is quickly transferred through the high thermal conductivity material to the surface and to the object being heated.

Heat Up to 400°C
