

LCS140

Lethality Compliance System

The LCS140 is a data logger with a full Wet-Bulb/Dry-Bulb system, allowing users to record humidity in high temperature applications where a normal humidity sensor isn't viable. The LCS140 ditches the complexity of calculating with a psychrometer, in favor of the easy to use MadgeTech 4 software.

Capable of withstanding temperatures from -40 °C to +140 °C (-40 °F to +284 °F), the dual probe LCS140 takes wet-bulb and dry-bulb readings simultaneously to determine the amount of humidity present.

The LCS140 Includes:

- LCS140 Dual Probe Data Logger
- Reservoir Bottle (recommended to use distilled water only)
- Wet Bulb Socks
- Hanging Fixture

The LCS140 is compatible with the latest MadgeTech 4 Software making starting, stopping, and downloading simple and easy. Graphical, tabular, and summary data is provided for analysis and can be viewed as a math channel.
